

Alex Monro

Software Developer

Vancouver, BC | alexmonro546@gmail.com | +1 778 899 5767 | alexmonro.com | github.com/alex-monro |
linkedin.com/in/alexwmonro

Software developer with formal front-end training and hands-on full-stack project experience. Builds accessible, UX-focused products with TypeScript, React, and Next.js, working across user interfaces, API routes, testing, and validation. Previously earned credits across 600M+ streams during a seven-year music career.

Projects

Radar — Accessibility Scanner | Playwright, axe-core, Hyperbrowser, OpenAI API radar.gogogravity.com | 2026

- Researched, designed, and built Radar, a web accessibility scanner for non-developers that checks any public URL and returns plain-English issue summaries, visual highlights, and copy-ready fix prompts.
- Wrote the scan back end using Playwright and axe-core in Hyperbrowser, Zod validation, Upstash Redis rate limiting, screenshot capture, and PageSpeed Insights for Lighthouse scoring.

isolate — Audio Stem Separator | Next.js, TypeScript, Replicate API tryisolate.xyz | 2026

- Built and launched an audio stem separator that uses Meta's Demucs model through the Replicate API to split uploaded tracks into vocals, drums, bass, and melody.
- Implemented the end-to-end processing flow, including uploads, client and server validation with Zod, waveform previews, selective downloads, and a no-account user path.

Experience

Music Producer Remote | 2018 - 2025

- Earned credits accumulating over 600 million streams, including 2 platinum albums, 4 gold albums, 1 gold single, and a Grammy-nominated record.
- Landed 20+ sync placements across MLB, NHL, TV, and film, including the Dumb Money motion picture (2023).

Aquabus & Q2Q Ferry · Captain and Lead Hand (SVOP certified) Vancouver, BC | 2014 - 2020

- Ran Dockwatch from summer 2018, coordinating a 20-boat passenger fleet over radio, managing captain breaks and rerouting through peak hours.

Education

British Columbia Institute of Technology (BCIT) 2025 - 2026

Front-End Web Developer Certificate, With Distinction

Coursework: JavaScript, React, responsive design, UI/UX fundamentals, CMS and online stores built with Shopify and WooCommerce

Technical Skills

Languages: JavaScript, TypeScript, PHP, HTML, CSS, Liquid

Frameworks: React, Next.js, Tailwind CSS
